Academic Program and Course Description Guide

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

<u>Academic Program Description:</u> The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

<u>Course Description</u>: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

<u>Program Vision:</u> An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

<u>Program Objectives:</u> They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

<u>Curriculum Structure:</u> All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

<u>Teaching and learning strategies:</u> They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extracurricular activities to achieve the learning outcomes of the program.

1. Program Vision

Teaching parasitology seeks to provide students with sufficient knowledge of pathogenic species and methods of treating them

2. Program Mission

Providing students with knowledge and skills in diagnosing and treating parasitic diseases

3. Program Objectives

- 1- Knowledge and understanding of veterinary medicine and related local, regional and international standards
- 2- Scientific skills that enable diagnosing veterinary diseases and dealing with various pathological conditions in animals and treating them
- 3- Thinking and analytical skills that enable solving emerging problems in the field of livestock, common diseases and basic sciences, in accordance with local, regional and international standards.
- 4- Use and self-development skills that enable competition with others in the labor market

4.	Program	Accreditation

5. Other external influences

6. Program Structure

Program Structure	Number of Courses	Credit hours	Percentage	Reviews*

^{*} This can include notes whether the course is basic or optional.

Year/Level	Course Code	Course Name	Cre	dit Hours
	Course Coue	Course Name	Cit	uit Hours
2024		Parasite	theoretical	practical

8. Expected learning outcomes of the program					
Knowledge	通用的图像表现实现的图像的图像是一种图像的图像				
nforming students about the most important types of parasites, their life cycle, and the diseases they cause					
Skills					
diagnosis					
treatment					
Ethics					

9. Teaching and Learning Strategies

- 1-The lecture
- 2- Discussion
- 3- Holding discussion circles
- 4- Holding training courses in the field of applications and practicality
- 5- Providing students with the basics and additional topics related to the previous learning outcomes of skills, to solve practical problems.

10. Evaluation methods

Weekly, monthly and daily exams and the end of the course exam.

11.Faculty					
Faculty Member	's				
Academic Rank	Specializa	ation	Special Requirements/Skills (if applicable)	Number of the teaching staff	
	General	Special		Staff	Lecturer
professor	biology	parasitology		staff	

Professional Development

Mentoring new faculty members

Conducting seminars, training courses and workshops to provide them with skills and experience

Professional development of faculty members

12. Acceptance Criterion

(Setting regulations related to enrollment in the college or institute, whether central admission or others)

13. The most important sources of information about the program

Arthropods, protozoa and helminthes, S.Soulsby (1982)

14. Program Development Plan

Following up on common diseases and their epidemiology, modern diagnostic methods, and knowing the most important newly invented treatments and vaccines

8. Cou	urse Objectives
Course Obje	
	from the period of ancient times to the present, through his study of a num
	of parasitic diseases and methods of detection using modern technologies.
	2- Providing the student with practical and theoretical information on how to
	study and culture microscopic organisms and follow modern molecular method
	in diagnosing some parasitic diseases that affect humans and animals
	ching and Learning Strategies
Strategy	
	1-Giving lectures (explanation and clarification).
	2- Using technological educational means as teaching aids (educational
	films, electronic lectures).
	3- Self-learning method by supporting a learner-centered learning
	environment.
	4- Urging students to use the library as a learning method
	5- Developing students' ability on the subject of microorganisms, the
	dangers, methods of transmission between humans and animals, a how to treat them with antibiotics.
	now to treat them with antibiotics.
